

**Product Code: VP C5 Octane Booster
Fuel System Additive
Applications**

- For vehicles racing in classes that do not allow use of Racing Fuels.
- For early model engines (Pre 1990) that are designed to run on lead.
- 1 bottle treats 80 Litres of fuel.
- Do not use with catalytic converters.
- For off road racing use only.

Why use VP C5 Octane Booster

- Raises octane up to 8 numbers for increased performance while providing lead lubrication.
- Contains MMT, the only effective octane booster other than TEL.
- Increased fuel octane helps to eliminate pre-ignition and detonation.
- This produces more horsepower and torque while permitting your engine to run cooler and to its full potential.
- Perfect for modified streetcars and occasional track day racers needing an edge over the competition or an added safety margin for engine life when running commercially available pump fuel.

Benefits of VP C5 Octane Booster

- Helps prevent pinging and detonation.
- Maximises potential horsepower of the engine.
- Reduces over heating and improves engine life.
- Allows for higher compression ratios and crisper throttle response.
- Provides upper cylinder lubrication especially for older cast iron engines
- Protects from valve seat recession in early model leaded, vintage and historic engines.
